

TPG Telecom IoT/M2M Device and Network Certification

Valid as of 27th March 2025

Certification Overview

Listed below are the cellular embedded modules and integrated devices that have been certified for use on the Vodafone Australia Mobile Network. The devices in this list have passed Vodafone Group IoT and TPG Telecom's respective IoT/M2M Device Assurance program, meeting TPG Telecoms mandatory network performance criteria and guidelines.

IoT Module certification: Vodafone Group IoT certify cellular embedded modules and integrated devices for use on the Global Vodafone IoT Network via the Global IoT Connectivity Management Platform (also known as GDSP – Global Data Service Platform)

IoT Device certification: TPG Telecom's IoT/M2M device testing and network certification process is carried out to ensure that IoT/M2M devices connect to the Vodafone Australia Mobile Network using the compatible Global Vodafone IoT M2M SIM.

TPG Telecom recommend device manufacturers use a Vodafone Group IoT approved module and certify the network performance of their IoT devices on the Vodafone Australia Mobile network to ensure optimal network performance.

Mandatory network frequency band requirements

For 4G, 5G devices, the below frequency bands are a mandatory requirement for devices connecting to the Vodafone Australia Mobile Network:

- 4G: B1 (2100), B3 (1800), B5 (850), B7 (2600), B8 (900), B28 (700).
- 5G: N1 (2100), N3 (1800), N8 (900), N28 (700), N78 (3500).

For NB-IoT devices, the below frequency bands are a mandatory requirement for devices connecting to the Vodafone Australia network:

- NB-IoT: B5 (850), B28 (700).

For devices that support 4G,5G and NB-IoT, the below frequency bands are a mandatory requirement for devices connecting to the Vodafone Australia network:

- 4G: B1 (2100), B3 (1800), B5 (850), B7 (2600), B8 (900), B28 (700).
- 5G: N1 (2100), N3 (1800), N8 (900), N28 (700), N78 (3500).
- NB-IoT: B5 (850), B28 (700).

Network Certified cellular modules

Refer to Vodafone Group IoT ([URL](#)) for the complete list of IoT /M2M certified modules compatible with our Global IoT Managed Connectivity Platform and Global Vodafone IoT M2M SIM.

Network Certified IoT devices

The devices listed below have been certified to meet our network performance requirements on the Vodafone Australia Mobile Network. The firmware version in the IoT device at the time of the certification process shall be the TPG Telecom approved firmware version.

Category	Vendor	Model	Name	Network support
Water Meter	Huizhong Instrumentation Co., Ltd	SCL-61H*	SCL-61H Ultrasonic Water Meter	NB-IoT
Water Meter	Sagemcom	WM NB528 W3*	Siconia® WATER WM	NB-IoT
Water Meter	Landis+Gyr	W370	W370 Ultrasonic Water Meter	NB-IoT

**Devices have also been certified to perform FOTA (firmware-over-the-air) on the IMPACT IoT Device management platform.*

For questions and certification request, contact one of our IoT specialists.
